## Communist Meeting Held Saturday Eve'g.

Murphy's Statements Freely Challenged by Audience and Atmosphere Warm at Times.

Mounting a soap box outside of the Coleman Cafe on Saturday shortly after 6 p.m., Harvey Murphy, Communist organizer, addressed a small crowd. He had nicely started when Constable Houghton told him to move over to the vacant spot beyond the post office, as he was causing an obstruction of the sidewalk.

Beneath the spreading maple trees by the post office the meeting was resumed, a number more men by this time having gathered, some feeling rather merry as a result of it being pay day.

Murphy opened his address on the problems of unemployment, and this rapidly developed into a slashing attack on the civic authorities of Calgary and the police, for the arrest and throwing into jail of nine Communists who took part in a parade.

He attacked the Labor leaders, and stated there were lots of men in Coleman who were afraid to express their opinions, and who enjoyed no more freedom than a bunch of slaves. Democracy was a hollow thing; elections were hollow things; the ban on the C.P.R. and the manufacturers all pulled the strings. The boss has everything coming his way and government is a sham. The only way to change this is by revolution, and the whole system at present is based on murder.

There were less coal miners working today than for many years, yet there are more accidents. The Bolsheviks in Russia have unemployment insurance based on trade union wages.

Many in this country want to forget there is unemployment, fearing it will cause an increase of taxes. We (the Communists) wish to smash the present system. Granaries in Western Canada are full, yet people are starving. He wanted registration of all the workers in the Crow's Nest Pass.

He had been asked why the Communists did not patch up their differences with the Labor party. How could they? What did Christophers do after nine years as their members? His son and daughter have government jobs, and Christophers was looking for a government job. How had he fought the opponents of Labor? He couldn't get elected against Froh White, Leavitt and Wheatley were apologists for the system.

The Communist party wanted a party of workers. Others said to send men to parliament you must have polished men. The average miner went to work at an early age, and the candidate is a worker like ourselves. Look at the Independent. What is he independent of? The Communist candidate will represent all parties, regardless of class. Another guy—Joe Stobbs, has been represented as a fighter; but as time goes on they lose their reputations. Where does Stobbs stand today? He was nominated by Brooks, and Joe says he is entitled to office. He quit the Communist movement to get the Labor nomination, after he had asked for the nomination of the Communist party following the May Day demonstration.

Asked by a man in the crowd if he was speaking the truth, Murphy stated of course he was, and he would back up his statements at the close of the meeting.

A vote for the Communists is a vote for revolution. Regardless of how secure one may feel, everyone will be educated by the realities of life itself, and the system today is shaking. Look at the British Empire. Interruptions from the crowd shouted that the old flag is still flying.

"Yes, and two millions in England are starving," replied Murphy to further interruptions, followed by reference to what the Red Flag meant to the workers.

The Communist party is running candidates to expose parliament. That is why they nominate workers, men of themselves. They were the only section of the Labor movement who would fight. Parliament was only a rubber stamp. Christophers was a Labor fakir who had feathered his own nest.

At this point Sam Hatfield interrupted to tell Murphy that at Drumheller Fred White had put him up like a clam. Heated remarks followed.

## WINNERS IN FORESTRY COMPETITION IN SCHOOLS

The winners in the Forestry competition arranged by Forest Ranger Boushon, outlined in last week's issue, were as follows:

Maple Leaf—Joe Leskosek 240, Elio Basto 240, Jean Youngberg 233.

Hillcrest—Robert Grubo 227, Josie Evans and John Sciarretta 235.

Bellevue—Ruby Cousins 237, Jean Piard and B. McInnis 238.

Frank—Madge Dalenacery 235 and the following gave the same estimate: V. Osadan, A. Vysohild, B. Murray, Y. Ruzicka.

Balmore—Gladys Morgan 237, Sidney Griesbach 236, Catherine McVey 238, Vernon DeCaue 236.

Coleman—Edna Morris 238, Marie Ondrus 238, Alf Moore 240, Alta Johnson 232.

Coleman—Henry Evans, Marjorie Johnston, Emily Kylien, Mabel Snood all estimated 237.

## Neavy-Gillespie Wedding

Last evening in the United church, Miss Neavy-Gillespie, daughter of Mr. and Mrs. D. Gillespie, was married to Mr. David Neavy, formerly of Forfarshire, and now of Trail, B.C.

The bride party entered to the strains of the Wedding March played by Mrs. Percy Salt, and the bridesmaid was Miss Jean Gillespie, sister of the bride. The best man was Andrew Balloeb, and the bride was given away by her father, Raymond Spillers and Wm. Balloeb were ushers.

Those from a distance attending were Mr. and Mrs. J. Irvine and Mr. and Mrs. Robert Deyl, of Edmonton, Mrs. Irvine and Mrs. Deyl being sisters of the bridegroom.

Following the ceremony, the wedding supper was served in the Knights of Pythias hall, which was decorated with streamers and wedding bells. At the head table the centre piece was an elaborate wedding cake, while cut flowers graced the tables. Places were arranged for 125 guests. The evening concluded with a dance.

The newly weds will reside at Trail, B.C., where Mr. Neavy is employed by the Consolidated Mining & Smelting Co.

## IT IS IMPORTANT TO REMEMBER IN VOTING

That the voter must not make the X mark. The candidate for whom he wishes to vote first choice must have a figure 1 placed opposite it; second choice a figure 2 and so on. According to the Election Act, marking a ballot with X makes it null, and the deputy returning officers have power to reject ballots so marked.

## DAMAGING PLAYGROUND EQUIPMENT

The school trustees will institute prosecution against older boys and young men who damage the equipment in the school grounds. At West Coleman some damage has already been done, and further damage will result in police court prosecutions.

Rev. A. S. Partridge of Taber was here last week making arrangements to move his family into the Rectory early in July.

ed, in which Hatfield called Murphy a liar, and Murphy retaliated in similar manner. The atmosphere became rather tense, but the more orderly element of the meeting steadied it down.

Referring to immigration, Murphy stated that immigrants were all classed as foreigners because they did not speak English. He had seen white-livered Anglo-Saxons who would "scab." A protest was raised against his remarks, and Murphy stated he did not intend to include all Anglo-Saxons, and referred to a labor dispute in Hamilton when the English workers used their influence to have all the foreign workers fired.

Various questions were asked Murphy on economic conditions in Russia, but the answers given were not altogether clear to the audience. The Communist candidate, made a brief address, stating he had been in the union movement since he was 20 years of age. Liberals, Conservatives and Labor governments had done nothing for the workers, therefore he felt sure his place was in the Communists' ranks. He concluded by inviting the audience to the whist drive and dance in the English hall in Boushton.

## "Duchess" Salutes Bridge

There was a happy incident at the opening of the \$20,000,000 Montreal Harbor Bridge on Victoria Day when the Canadian Pacific liner "Duchess of Richmond," 20,000-ton giant under the command of Captain A. Freer, R.N.R., added the salute of its deep siren to the cheers of the thousands assembled. Just as Premier MacKenzie King was formally opening the bridge, the liner passed dramatically

beneath it with multi-colored flags fluttering from bow to stern and her ensign dipping in the salute. Then she hailed the bridge with the stentorian "long, two short and long" blasts that herald arrival of Canadian Pacific ships. It is interesting to note that what is seen of the bridge contains the same weight of steel—20,000 tons—as there is in the ship.

## ELECTION CAMPAIGN IN FULL SWING WITH THREE CANDIDATES IN FIELD

Miners in Two Camps Nominate Labor and Communist Candidates—Cruckshank Endorses as Independent Candidate

### Keen Campaign Anticipated in Closing Week

The die is cast! Rocky Mountain Electoral District has three candidates to contest the provincial election, the names being submitted to Returning Officer James Ford on Monday as follows, in the order in which they will be printed on the ballots: George E. Cruckshank, hardware merchant, of Hillcrest; Joseph Stobbs, miner, of Hillcrest, and Richard Sudworth, miner, of Coleman. This is ended the speculation which has been rife during the week as to how many candidates would run. Labor support has been divided by the advent into the Crow's Nest Pass of the Communist League, and despite efforts being made to induce the Communist candidate to withdraw in favor of the straight Labor candidate, the decision was made at a meeting called by the officers of Coleman local on Sunday, to support the Communist nominee by voting him \$500 towards expenses, and by a majority vote to endorse Stobbs. Many regular members of the union have refrained from attending meetings in recent months, owing to the clash of opinions, consequently the Communists have had control.

The true indication of their measure of support can only be determined when the ballots are counted.

## Conservatives Organize

A big rally of Conservatives was held here on Friday night last, for the purpose of re-organization.

Election of officers resulted as follows: Honorary President, R. B. Bennett; president, John Kerr, Passburg; vice-presidents, William Burns, Coleman; E. C. Costick, Bellevue; William Warren, Banff; A. A. Colbrook, Canmore; secretary, S. G. Bannan, of Blairmore.—Enterprise.

## Local News

Mae Bell, who has been attending Garbutt Business College, Calgary, is home for summer vacation.

Coleman baseball team played against West Coleman on Monday evening, the result being 25-9 for Coleman.

Full size Four Blade Ball Bearing Lawn Mower priced to clear, \$12.00, at Pattinson's hardware store.

## MARK YOUR BALLOT:

Cruckshank 1

## Local News

The ladies of the Italian Society are holding a series of dances, with Altermatt orchestra, on June 14, 21, 28 and July 5, in the Italian hall.

The Rehoboth Lodge on Monday evening welcomed a visit from the grand secretary, Sister Adah Day, of Calgary.

Margaret Halliwell and Lillian Larsen, nurses-in-training at Medicine Hat general hospital, are spending three weeks' vacation here.

F. Oregan of Lomond has taken the place of Mr. Price as teller in the Bank of Commerce here, and he will move his family to Coleman.

Four of the four polling sub-divisions for the provincial election are on display in the post office and at four other places. Those whose names are not on the lists may, if qualified, have same placed thereon on Tuesday and Wednesday next, when the enumerators, W. J. White and Harold Turner will sit at the council chamber for that purpose, for the revision of the lists.

## Pass Liberals Re-Organize Association

Decide Not to Nominate Candidate—Independent Candidates Is Endorsed.

Representative Liberals of Crow's Nest Pass met last week in the Empire hotel, to re-organize for the provincial campaign. Owing to Rocky Mountain electoral district being strongly in favor of straight Labor representation, it was decided that it would not be advisable to place a Liberal candidate in the field, consequently it was the sentiment that nomination of the Independent candidate, George E. Cruckshank, be endorsed, and a resolution to this effect was to be communicated to the Rocky Mountain Park Liberal Association, with headquarters at Banff, of which James Brewster is president.

Officers elected were: Hon. Presidents, Rt. Hon. W. L. MacKenzie King and J. W. McDonald, K.C.; president, A. M. Morrison, Coleman; secretary, J. E. Gillis, Blairmore; executive, G. Pattinson of Coleman, C. J. Tompkins of Blairmore, A. Krywlott of Frank, J. J. McIntyre of Bellevue and Philip McNeil of Hillcrest.

A ladies' department for haircutting and marcelling has been added to Graham's barber shop. Stephen Machin has taken the place of Clarence Huffman.

Mrs. Alex Cornett won a prize of \$10 for writing a short story in an advertising competition conducted by the Lethbridge Herald. Mrs. W. H. Jewell of Hillcrest won the third prize of \$20.

Ministerial changes in the United church pastorates indicate that Rev. H. J. Bevan will move to Champion, and Rev. A. E. Larke from Compo, in the southeastern part of the province, will take his place. The change will become effective July 1st.

## Announcement

Dr. McLeod wishes to announce that his office in Coleman will be closed from July 15th to September 1st.

## The Canadian Pacific Bubble

The following extract from an editorial in "London Truth," published, September 1, 1931, 49 years ago, is amusing:

The Canadian Pacific Railway company has begun, I see, to launch its bonds. A group of Montreal and New York bankers have undertaken to float ten million dollars worth of the company's land grant bonds, and the Bank of Montreal, with its usual courage, has taken one-fourth of the entire loan. This announcement looks as if the Canadians were going to raise the necessary capital on the other side of the water, but I have a shrewd suspicion that they have no real intention of doing anything of the kind. The New Yorkers are keen enough gamblers, and reckless enough at times I admit, and yet it is impossible to believe that they are such fools as to put their money into this mad project. I would as soon credit them with a willingness to subscribe hard cash in support of a scheme for the utilization of icebergs. The Canadian Pacific Railway will run, if it is ever finished, through a country frost-bound for seven or eight months in the year, and will connect with the western part of the Dominion a province which embraces about as forbidding a country as any on the face of the earth. British Columbia, they say, has forced on the execution of this part of the contract under which they become incorporated with the Dominion, and believe that property will come to them when the line is made. This is a delusion on their part. British Columbia is a barren, cold, mountain country that is not worth keeping. It would never have been inhabited at all, unless by trappers of the Hudson's Bay Company, had the "gold fever" not taken a party of mining adventurers there, and even since that fever died down, the place has been going from bad to worse. Fifty railroads would not galvanize it into prosperity.

Nevertheless, the Government has fairly launched into this project and I have no doubt the English public will soon be asked to further it with their cash. The parade of selling bonds in New York and Montreal and the not-withstanding lawlessness that "Syndicate" bankers and loan contractors have adopted in order that it may seem that they have faith in the schemes they father. I doubt if ten millions of dollars of ready cash could be found in all of Canada for this or any other work of utility which could be so much idiots as to throw away their money in the support of their own if they can borrow their neighbors'. The Canadians spend money and we provide it. That has been the arrangement hitherto, and they have worked out splendidly—for the Canadians—too well for them to try any other scheme with the Canadian Pacific, which they must know is never likely to pay a single red cent of interest on the money that may be sunk into it. A friend of mine told me, and he knew what he was talking about, that he did not believe the much touted Manitoba settlement would hold out many years. "The people who have gone there cannot stand the coldness of the winter and the coldness of the death in numbers that would rather strangle the intending settler if he knew; and those who are not killed outright are often maimed for life by frost-bites. Their street mutes kill people with malaria, or drive them mad with plagues of insects; and to keep themselves alive during the long winter they have to imitate the habits of the Eskimoes. Those who want to know what it is like should read the not-withstanding lawlessness of Colonel Butler. His "Great Lone Land" is the land of which the Canadian Pacific Railway has what five and twenty million acres to sell and it is through a death-dealing region of this kind that the new railway is to run."

An the bonds "secured" on this land or others guaranteed by the Dominion Government are sure to be offered in this market by the "Bankers" and others of the company. I think a word or two on Canadian finances in general would be in season. Canada is one of the most over-rated Colonies we have, but it is heartily "loyal" and makes the loyalty note, its astute inhabitants know well how to work on John Bull's susceptibilities, and I have seen nothing finer in the way of advertising than poor Lord Lorne's "Tour" now in progress. He has gone to the North and the South, and the pushing accounts we are receiving from the "Specials" who are accompanying him are admirably adapted to create a belief that the true land of promise is to be found there at last. With such soil to till, and among such Queen worshippers, the distressed British farmer would be in bliss. Of course they who choose can believe all that. For my part I know of only one province in the whole Dominion—that of Ontario. "It is the only province," as a shrewd land jobber said to me once, "where you can lend money on land with any hope of ever seeing your own again." As for the country as a whole it is poor and it is a poor market here, but that did not stop the new railway. Thirty-five million pounds altogether, and every province has its separate debt, as also has almost every collection of shanties calling itself a "city." The Province of Quebec are both notoriously bankrupt, and the latter was obliged to go to Paris with its last loan, probably because nobody would lend it here. Last year the country had the benefit of a good crop and a good market here, but that did not stop the new railway. Generally it has hard work to make both ends meet, and often couldn't run. Nearly every year it comes for a new loan or two, and once it is fairly committed to making the new railway it has no choice but to run. While the money is being spent all will go well enough, perhaps, but in the end the Dominion will have to go into liquidation. It annoys me that its stocks stand where they do as things are, but if people look a trouble to look beneath the surface, prices would be very different. One of these days when the loan gets too heavy, Ontario is pretty certain to go over to the States and there it will have its best trade outlet. When the day comes the "Dominion" will disappear. "The Dominion" is ahead and with the prospect of another fifty million pounds or so to be added to the debt, the "Dominion" is in a "fraudulent" position. "Cent" are worth their present price? This "Dominion" is in a "fraudulent" position. "Cent" are worth their present price? This "Dominion" is in a "fraudulent" position. "Cent" are worth their present price? This "Dominion" is in a "fraudulent" position.

### Avalanche Easily Started

Even a whisper has been known to start an avalanche on the Alpine passes. One disastrous avalanche was attributed to the tinkle of the sleigh bells, and the use of bells has been prohibited on that particular mountain.

Madras, India, is to have a suburban electrified railway service.

### Moved Town Hall

To make more room for traffic, the 150-year-old town hall of Randers, in Jutland, was recently moved two yards on trolleys. The building is 64 feet long, 31 feet wide, and 40 feet high. It was moved so smoothly that the clock in the tower did not stop.

People in Germany ate nearly 2,000,000 American sausages last year.

**DR. WILLIAMS' PINK PILLS FOR PALE PEOPLE**

For Troubles due to Indigestion, Acidity, Headache, Nervousness, Debility, and all the ailments of the blood.

Many people, two hours after eating, suffer indigestion as they call it. It is usually excess acid. Correct it with an alkali. The best way, the quick, harmless and efficient way, is Phillips' Milk of Magnesia. It has remained for 50 years the standard with physicians. One spoonful in water neutralizes many times its volume in stomach acids, and at once the symptoms disappear in five minutes.

You will never use crude methods when you know this better method. And you will never use crude methods when you prove out this easy relief. Please do that—for your own sake—now.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any druggist.

### Honor British Dead

Soldiers Who Lie in Washington Cemetery Remembered On Memorial Day

While the United States on May 30, Memorial Day, remembered its soldier dead with pilgrimages to cemeteries throughout the country, the British and Canadian soldiers who lie in Arlington Memorial cemetery, at Washington, were not forgotten.

In the bright sunshine a small group from the Canadian Legation and the British Embassy moved through the groves of Arlington, laying wreaths on the graves of 12.

Keith P. Crowther, from the Legation, was escorted by Sergeant Lamont, of the Royal Canadian Mounted Police.

## AGONY OF NEURITIS

A Story Of Intense Suffering and Relief

"Do I recommend Dr. Williams' Pink Pills? You may believe I do," says Mr. John H. Jamieson, of Wallaceburg, Ont. "For five years I suffered day and night from neuritis. The agony was terrible. I lost control of my arm and shoulder and my hand became shriveled. Nothing helped me till I began taking Dr. Williams' Pink Pills. Even then the improvement was slow and I took ten boxes before I was on the way to recovery. After that, though, relief was rapid. My hand gradually filled out; the pain left me and I could sleep in peace. That was two years ago and I have not had a twinge of the neuritis since."

Sufferers from neuritis, neuralgia or rheumatism should try the common-sense method of banishing these troubles by enriching the blood and strengthening the nerves with Dr. Williams' Pink Pills. These Pills are sold by all medicine men. They have mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

### Helping the Empire

Wise "Old Country" Housewives Buy Canadian Produce

"Wise shopkeepers stock Canadian produce, good housewives buy it," is the maxim underlying the Empire Marketing Board's latest Canadian poster frame set now appearing on the Board's special frames in London and nearly five hundred cities and towns in "old country."

The set consists of five posters. A Canadian apple orchard in flower and a ship for Canada under construction in a United Kingdom shipyard, are the subjects of the first and fifth. In the centre are maps of the United Kingdom and Canada drawn to scale. To right and left are smaller posters showing barrels of Canadian apples being unloaded at the docks and a customer inspecting a display of Canadian food products at a grocer's shop.

The posters point out how bigger purchases of Canadian products will result in bigger orders for Home factories. "Every time you buy Empire produce you help the Empire to buy the goods you make at home" is the message of the whole set.

Persian Balm creates and preserves lovely youthful complexions. Tones and stimulates the skin. Fragrant as a flower. Cools as morning dew. Swiftly absorbed by the tissues, making the skin wonderfully soft-textured. Unrivalled as an aid to feminine elegance. Delightful to use. Imparts additional charm to the complexion. Persian Balm is the one toilet requisite for the exacting woman. Peerless as a beautifier.

### Order Weed Burner

Machine Shipped To Morocco By Alberta Company

A stubble and weed burner made by the Alberta Foundry and Machine Co., has been shipped to Morocco, where it will be used to destroy the eggs of the wild locusts. The order was received from the Comarex Compagnie Franco-Marocaine d'Exportation de Casablanca. The company heard of the machine through Mr. Stark, an agent of the British Foreign Office, at Casablanca, who called the company at Medicine Hat to send pictures and a description of the burner. These were sent and shortly afterwards an order was received from the French consular.

### Would Limit Sale Of Poisons

To minimize the number of deaths by poisoning, the British Government proposes to establish a Poisons Board which will permit only a limited number of chemists to vend poison. These agents will be instructed not only to ascertain the name and address of the purchaser, but also to verify it before completing the transaction.

Another phase of much-needed national adjustment is disclosed by the fact that there are over 26,000 automobiles and less than 1,000 hospital beds in this country.

Use Minard's for Rheumatism.

W. N. O. 1841

## DO YOU SUFFER WITH HEADACHE?

So easy to get quick relief and prevent an attack in the future. Avoid bromides and dope. They relieve quickly but affect the heart and are very dangerous. They are depressing and only give temporary relief, the cause of the headache still remains within. The same and harmless way. First correct the cause, sweeten the sour and acid stomach, relieve the intensities of the decayed and poisonous food matter, gently stimulate the liver, pass the bile flowing and the bowels pass off the waste matter which causes your headache. Try Carter's Little Liver Pills. Druggists 25c red pigs.

### Pleased With Extension

Edmonton Coal Men Delighted With Decision On Special Rates

Coal men at Edmonton are delighted with the announcement that the Federal Government has granted an extension of the period of special freight rates on coal shipments from Alberta to Ontario. Official word of the extension was given in a telegram received by Howard Stutchbury, Alberta's Minister of Agriculture, from E. J. Garland, M.P. who has been working on the matter.

Under the three-year period for the special rates, the term would have ended this year as it had been in effect from December 15 to July 15 since 1928. The extension now granted means that shippers will be assured of the special rates being in effect from December 15 to July 15 of 1931.

Mr. Stutchbury pointed out that the provincial government, the Canadian Fuel Association and other bodies have been pressing for the extension for some time. It was felt that this should be granted on thus giving adequate time for the cost figures of the three-year period to be thoroughly studied.

## FAINT, DIZZY SPELLS Had To Sleep Propped Up In Bed

Mrs. Norman Bishop, Salisbury, N.B., writes:—"I was troubled with faint and dizzy spells and when I would lie down I would suffer terribly with smothering spells. I got so bad I had to sleep propped up in bed. "My doctor said it was my heart and nerves, and that I needed a good tonic."

"I was advised to take MILBURN'S HEART AND NERVE PILLS. I had not taken one box when I could lie down and sleep like a child." Price, 50c, a box at all druggists and dealers or mail direct on receipt price by The C. Milburn Co., Limited, Toronto, Ont.

### Air Travellers Insured

New Line Opened Up By Popularity Of Airship

The increase in the popularity of airship travel has opened up a new line of insurance. Several passengers on the Graf Zeppelin's present flight to South America insured themselves for the round trip on the travel ticket system.

A passenger on the R-100 has been insured for the duration of the two trips across the Atlantic. His premium is two pounds. As the westward and the eastward trips combined are not expected to consume more than six days' time, this rate is equivalent to a premium of about 120 per cent. of the policy amount on the basis of a year.

A Remedy For Earache.—To have the earache is to endure torture. The ear is a delicate organ and few care to deal with it, considering it work for a doctor. Dr. Thomas' Electric Oil offers a simple remedy. A few drops under a piece of lint or medicated cotton and placed in the ear do much in relieving pain.

Leaving Britain For First Time The first steam locomotive, Stephenson's "Rocket," will be sent from London to the Chicago "Century of Progress" Exposition, Arthur Henderson, Foreign Secretary of Britain, has officially advised U.S. Ambassador Charles C. Dawes. It was understood this will be the first time the "Rocket" ever left Britain.

Minard's for Falling Hair.

Chimney-sweepers are remarkably free from colds, observes a doctor. But they're used to the flu.

Insects are costly, their control is one of the greatest problems with which any country is confronted.

Greece's current crop last year weighed 250,000,000 pounds.

## Britain's New Flying Operating Theatre

Machine Just Completed Is Equipped Up-To-Date

For use in the output of the British Empire, a remarkable new flying operating theatre has just been completed. In order that a patient may be lifted gently, the sides of the cabin are hinged, so that they fall completely open. There are racks for surgical appliances of all sorts, and room for two attendant nurses as well as a doctor. The fuselage is especially sprung in order that taking off and landing shall not unduly disturb the patient. An ice chest, fresh-water tanks, and a small electric stove for heating water form part of the equipment. The machine is fitted with two Napier Lion engines, giving a total of nearly 1,500 h.p., and the aerial operating room can be maintained in the air with only one engine working with very little reduction of speed. Operations would be carried out in mid-air only in the most urgent cases; but there have been instances where the lives of settlers, soldiers, and natives in remote outposts could have been saved by an immediate operation, followed by skilled nursing, could have been assured. The new aeroplane will meet this need.

### Recipes For This Week

(By Betty Barclay)

#### CHOCOLATE PIE

2 squares bitter chocolate.  
¾ cup sugar.  
¼ cup flour.  
¼ teaspoon salt.  
1 cup boiling water.  
1 cup evaporated milk.  
3 egg yolks.  
1 tablespoon butter.  
¼ teaspoon vanilla.  
Baked pastry shell.  
Melt chocolate over hot water. Add sugar that has been thoroughly mixed with flour and salt. Blend well. Add boiling water and milk. Cook in double boiler 25 minutes, stirring occasionally. Four chocolate mixture gradually over well-beaten egg yolks, beating vigorously to prevent curdling. Return to double boiler and cook 2 minutes longer. Add butter and flour. Beat slightly and pour into cold baked pastry shell. Cover with meringue and brown to the preferred color in a slow oven.

#### CARROT SURPRISE

¾ junket tablet.  
¼ teaspoon cold water.  
¼ cup carrot puree.  
1 cup milk.  
Salt.  
Crush junket tablet and dissolve in cold water. Prepare the carrot puree by rubbing cooked carrot through a sieve. Add milk and season with salt. Warm until lukewarm—not hot—remove from stove and add dissolved junket tablet. Turn into individual dishes and let stand in warm room until firm—about ten minutes. Serve warm or chilled as preferred.

Among certain tribes of Africa, brides may be purchased on the installment plan.

### A Growing Industry

Demand For Bulbs Grows On Vancouver Island Exceeds Supply

"Bulb growing on Vancouver Island is still an infant industry," said Mr. T. B. Dempster, who is probably the largest grower of bulbs in British Columbia, as well as the pioneer grower of bulbs on the Island for export, having been established for twenty-one years. "The possibilities for the growth of this industry are enormous. We could do a greater volume of business than we are doing at present if we could supply the demand, and occasionally find ourselves in the position where we must buy bulbs for our own use."

No Rest With Asthma. Asthma usually attacks at night, the one time when rest is needed most. Hence the loss of strength, the nervous debility, the loss of flesh and other evils which must be expected unless relief is secured. Fortunately relief is possible. Dr. J. D. Kellogg's Asthma Remedy has proved its merits through years of service. A trial will surely convince you.

Out of some 50,000 books published in the seventeenth century, not more than 50 are generally known to people of the twentieth century.

EVERY BIRD LOVER should have this new edition of the "Birds' Book on Birds" which contains 24 pages of practical advice on the care and feeding of cage birds; also entered 60 pages of practical advice on the treatment of bird diseases.

Every Bird Lover Should Have This Book

Among certain tribes of Africa, brides may be purchased on the installment plan.

The increase in the popularity of airship travel has opened up a new line of insurance. Several passengers on the Graf Zeppelin's present flight to South America insured themselves for the round trip on the travel ticket system.

A passenger on the R-100 has been insured for the duration of the two trips across the Atlantic. His premium is two pounds. As the westward and the eastward trips combined are not expected to consume more than six days' time, this rate is equivalent to a premium of about 120 per cent. of the policy amount on the basis of a year.

A Remedy For Earache.—To have the earache is to endure torture. The ear is a delicate organ and few care to deal with it, considering it work for a doctor. Dr. Thomas' Electric Oil offers a simple remedy. A few drops under a piece of lint or medicated cotton and placed in the ear do much in relieving pain.

Leaving Britain For First Time The first steam locomotive, Stephenson's "Rocket," will be sent from London to the Chicago "Century of Progress" Exposition, Arthur Henderson, Foreign Secretary of Britain, has officially advised U.S. Ambassador Charles C. Dawes. It was understood this will be the first time the "Rocket" ever left Britain.

**HUNTER-MARTIN & CO., REGINA, SASK**

## IMMIGRATION TO BE CONTROLLED BY PROVINCES

Regina.—Commenting on despatches from Edmonton and Winnipeg, Premier J. T. M. Anderson said that Saskatchewan had secured an understanding with Ottawa that the province would in future have control of the character and number of immigrants. While no agreement has yet been signed, the province has an understanding similar to that now existing in the other prairie administrations.

Edmonton.—All immigrants coming into Alberta from now on are to be voluntary, coming on their own responsibility, and prepared to take care of themselves, by agreement with the Dominion Government, says Acting Premier Hon. George Hoadley. The right to determine the volume and character of future immigration is to be left to the provinces, this arrangement dating from June 1, and no further movements are to be allowed without the knowledge and approval of the provincial governments. The agreements with the transportation companies, under which immigrant parties have heretofore been brought over, expired at the end of May and will not be renewed.

It is expected that the inter-provincial conference between the three prairie provinces, which is to be held in Winnipeg and which is to deal particularly with immigration and unemployment will materialize shortly after the Alberta election. The entire question of future immigration policy and methods will then be taken up.

Winnipeg, Man.—Manitoba is in control of volume and character of immigrants to the province, Hon. A. Hoey, acting premier of Manitoba, stated, but no agreement has been consummated with the Dominion Government. Mr. Hoey referred to a statement made at Edmonton by Hon. G. Hoadley, acting premier of Alberta, who said that Alberta had completed an agreement on immigrants with Ottawa authorities.

The Dominion Government's proposal for handling immigrants was submitted tentatively to the Manitoba Government. It was decided, however, that the matter be considered at a province-Dominion conference. In the meantime the question was allowed to stand undecided. Mr. Hoey thought difficulties would arise until provincial agreements are arrived at to prevent removal of immigrants from one province to another.

## Grain Elevator Burned

Cause of Fire Believed To Be Spontaneous Combustion

Silton, Sask.—The Pool elevator, built in 1912 and containing 11,000 bushels of grain, was a smouldering heap, on Wednesday morning, June 4, as the result of a fire that broke out the night before. The loss is estimated at about \$35,000. The fire is believed to have been a spontaneous combustion. Seven empty C.P.R. box cars standing on the loading tracks when the fire commenced, were pushed to safety by men handling them further away.

Prince Substitutes For King

London, England.—The Prince of Wales substituted for King George in the trooping of the colors during the Horse Guards' parade on the monarch's birthday. He wore the uniform of a colonel of the Welsh Guards. King George, who was 65 years old, watched from a balcony of the admiralty building. He seemed fit despite the rheumatic attack which prevented his participation.

A Six-Horse Town

Churchill, Man.—Population of Churchill, on Hudson Bay, has been tripled, speaking in equine terms. Two teams of horses were brought to the port from The Pas, to join the line duo of horses that have been just season by the Department of Railways and Canals. So Manitoba's most ambitious settlement is now a six-horse town.

Against Channel Tunnel

London, England.—Prime Minister MacDonald informed the House of Commons that the government had decided against the construction of the proposed English Channel tunnel. The Prime Minister said a statement on the subject would be circulated in a white paper. He did not indicate the reasons leading to the cabinet's decision.

W. N. U. 1841

## Health Insurance System Advocated

Would Curtail Illness Loss Caused By Sickness Is Belief

Toronto, Ont.—A state health insurance system as a means of curtailing a large percentage of the \$300,000,000 loss of productive capacity in Canada annually from preventable illness was strongly recommended for support by the Canadian Manufacturers' Association in the report of the industrial relations committee here at the 59th annual meeting of the association.

The report cited findings of a special commission appointed by the British Columbia Government in support of the recommendation and stated experience in England, Germany and the United States show that sickness causes more loss time than all other causes put together. The industrial relations committee expressed a willingness to co-operate with the government in the movement for a thirteen month calendar.

## Distributing Samples Of Champion Wheat

Toronto Visitors Will Be Reminded Of Alberta's Victory

Toronto, Ont.—Five thousand samples of the consignment of Alberta wheat which won the world's championship at the Chicago Grain Exposition last fall will be distributed among visitors at the Shrine convention here.

Arrangements for the novel method of attracting attention to Alberta's and Canada's achievements in the world of agriculture were concluded by Hon. George Hoadley, Alberta Minister of Agriculture. As the result of his negotiations, 5,000 samples containing the wheat samples are ready for distribution to interested Shriners or their families.

The champion wheat was grown on the farm of Joseph H. B. Smith, at Wolf Creek, Alta.

## Question Can Wait Action

No Hurry On Fixing Bay Route Insurance Rates On Shipping

Ottawa, Ont.—Question of insurance rates on shipping by the Hudson Bay route is relatively unimportant at the present time, stated Hon. T. A. Crerar, Minister of Railways and Canals. His statement referred to the report of the imperial shipping committee to the Canadian government, saying that it will be impossible to fix rates until navigation is under way and the monthly ice-breakers and direction finding wireless equipment is established.

Mr. Crerar mentioned that it will be 14 to 15 months before European traffic uses the bay route to any extent.

When asked if the government would take over the insurance of shipping until the new rates are struck, Mr. Crerar said no consideration had been given to that phase of the question.

## Grain Broker Sentenced

Winnipeg Man Is Given Two Years In Penitentiary

Winnipeg, Man.—F. H. Bole, prominent Winnipeg grain dealer, was sentenced to two years in penitentiary on charges of obtaining money from the Bank of Montreal by false statements. Mr. Bole, who was head of the Electric Elevator Company, Limited, recently suspended from trading on the Winnipeg exchange, pleaded guilty in provincial court.

Three charges were laid against the grain official, covering amounts totalling \$85,000 alleged to have been obtained from the bank. After entry of a plea of guilty to all three charges, Mr. Bole was sentenced to one year on one charge, and two years on each of the other two charges. All sentences, the court ruled are to run concurrently.

## Icelanders Leave For Celebration

Going Home For Big Anniversary Of First Parliament

Winnipeg, Man.—Prominent members of western Canadian Icelandic communities numbering 150, left here June 3, bound for the millennial celebration of the Althing, to be held in Reykjavik, Iceland.

At the station, hundreds of friends and representatives of local organizations gathered to farewell the party, which includes Prof. R. Beck, head of the department of Scandinavian languages, University of North Dakota, and H. Westgaard, Norwegian vice-consul at Estevan, Sask.

## New Senators Appointed

Five Vacancies In Province Of Quebec Are Filled

Ottawa.—Appointment of five new senators from the province of Quebec was announced following a lengthy meeting of cabinet.

Those appointed to the senate are: Hon. Rodolphe Lemieux, who was speaker of the House of Commons; E. W. Toubin, late Federal member for Richmond, Wolfe; J. E. Frevost, late member for Terrebonne; George Paré, late member for Quebec West; and L. A. Wilson, former member for Caudreuil-Soulages.

In making the announcement, Prime Minister Mackenzie King explained that the fifth Quebec vacancy in the senate arose through the resignation of Senator Louis Lavergne, of Kennebec. It is understood that ill-health is the cause of the resignation of Senator Lavergne.

Mr. King also stated that it had been the rule in the past not to appoint members of parliament to the senate. There had been some exceptions but the general rule had been followed for some time. This explained why all those appointed at the present time were former members of parliament who had held seats up to the date of dissolution.

## FOREST FIRES DESTROY SCORES OF FARM HOUSES

Port Arthur, Ont.—Fourteen-year-old boys, grim-faced, weary from loss of sleep, fought like men and did men's work in Sioux Lookout's valiant defence against forest fire invasion. V. R. "Bill" Hicks, Ontario air force pilot who arrived here, told forestry officials and newspapermen who met him. Sioux Lookout is out of danger now, Hicks said, and the few fires that remain in that district are under control.

More than twenty-five families, approximately 75 persons in all, were temporarily homeless, driven from their homesteads by the relentless onrush of devastating forest fires of timber land in north-western Ontario for the past six weeks.

While a large force of forest rangers and volunteers were heroically battling against the numerous blazes, word was received of the first fire fatality.

The body of Paul Gerten, former German war ace, who had been employed as pilot by the Western Canada Airways, was recovered from the waters of Lake Seesagana, near Allanwater, Ont. It is believed that Gerten's machine, enveloped by dense smoke clouds crashed into the lake, June 2. On that day, the airman was on a cruise over the flame-ridden country, scouring for possible refugees and checking on the path of the fire. Gerten distinguished himself as a flyer with the famous Rich-ten Circus on the Western front during the war.

Larson is a blackened ruin. The little railway hamlet about two miles west of the lakehead on the Canadian National Railway fell prey to flames, and its few residents fled to neighboring towns.

Frame houses at isolated points in the Larson region were destroyed, bringing the total loss in personal property close to \$100,000.

When Albert E. Swain's milk farm was totally demolished and the animals lost, damage was estimated at \$50,000.

## WHERE R-100 WILL "LAND"

Extensive preparations for handling the huge crowds who are expected to greet the monster dirigible upon its arrival at St. Hubert Air Field, near Montreal, from England, are being made by the Canadian National Railways.

Special trains will be operated from Bonaventure Station to St. Hubert, where trackside is being installed specially for the handling of this service. The photographs show: Left, the huge mooring mast constructed in preparation for the arrival of the R-100. Upper, trackmen at work installing sidings in preparation for the special trains which will be operated during the dirigible's visit.

## NEW U. S. MINISTER

Lieut.-Col. Hanford MacNider, who has been chosen by President Hoover as United States Minister to Canada.

## Canada Will Be Represented

Delegates Have Sailed For World Power Conference At Berlin

Ottawa.—Canada will be well represented at the second world power conference to be held in Berlin, Germany, June 16-25, it was announced by Dr. Charles Cammell, Deputy Minister of Mines and Chairman of the National Committee. Not only have many Canadian delegates sailed, but several papers will be delivered on the water power resources of this country.

Among the Canadian delegation will be Dr. Cammell, John Murphy, electrical engineer, Department of Railways and Canals; Hon. P. P. Brandon, Minister of Lands, British Columbia; Dr. T. H. Hogg, chief hydraulic engineer, Hydro-Electric Power Commission of Ontario; G. A. Gaherty, president, Calgary Power Company; J. C. Cassano, general manager, Winnipeg Hydro-Electric System.

A feature of the conference will be a telephone radio hookup on the occasion of the official banquet on June 19, at 5 p.m. E.S.T. Berlin, London, England, San Francisco, Cal., and Thomas Edison's laboratory will be included in the hookup.

Mr. Edison will speak from his laboratory in New Jersey.

## Blue-Print Makes Air Trip

Carried By Wind From Melita, Manitoba To Saskatchewan Town

Brandon.—Carried more than 175 miles through the air by the high winds, a blue print travelled from Melita, Man., to Assiniboia, Sask., where it was picked out of the air by a resident of the latter town. The air by a resident of the latter town. The air by a resident of the latter town. The air by a resident of the latter town.

The print had been sent to Melita in a bid for some work and was known to have been in the possession of the Melita people, and no other copy was in existence.

## Mission Hospital Burned

Fort Simpson, N.W.T.—Inflicting loss over \$50,000, flames of unknown origin swept through the Roman Catholic Mission Hospital here on June 4. Heroic work on the part of the sisters in charge of the institution was responsible for the saving of all patients and considerable of the valuable hospital equipment. The old building was erected about 20 years ago.

## Needs Canada's Co-Operation

Without Her Help Britain Cannot Develop Atlantic Airways

London, England.—The air lines of the British Empire are expanding rapidly and rank second only, in mileage, to those of the United States, declared the Rt. Hon. Lord Thomson, secretary of state for air, in the House of Lords, during a broad and lasting review of the Empire's accomplishments in the world of flying.

Lord Thomson predicted an era of great aerian expansion within the Empire in the next year or so. He stated there were now about 22,350 miles of regular air routes. He hoped the end of 1931 would see an extension of the Indian route towards Australia, but the date for the completion of this plan, he said, rested largely with the government of Australia.

The Cape to Cairo route should be completed as far as the great lakes of Central Africa by the end of this year and be in full operation by the spring of 1931.

What was called the Atlantic airways in the western Atlantic. Such a development, although started, could only be carried through with the co-operation of the Canadian government and the most sympathetic response was coming from Canada. A great deal of work had been done by the consultative committee established last July, said the secretary of state for air. They had reported favorably on the Atlantic airways scheme and he was fairly confident now that "we should be able to do something along this line."

## Strike Natural Gas Well

In Search For Water Near Hudson Bay Junction

Hudson Bay Junction, Sask.—There was a big rush here for natural gas, when prospectors and citizens left for the scene of a blazing well, 20 miles south of Hudson Bay Junction.

While a C.N.R. well digging outfit sought water at a depth of 300 feet, they noticed a gas escaping and set a match to it. It ignited at once and is still burning with a flame about ten feet high. There are indications of oil at some points in this district and claims have been stated over the last few years but this is the first indication towards a natural gas well. It is reported that if the well were deepened a great supply of gas would be released.

## Message From King George

Replies To Congratulations On Birthday From People Of Canada

Ottawa, Ont.—Replying to a message of congratulatory sentiment on behalf of the government and the people of Canada, His Majesty King George, called Premier King as follows: "I sincerely thank you, the government and people of Canada for your greetings and good wishes on this anniversary of my birthday. I much appreciate the loyal sentiments to which your message gives expression."

## THOMAS GIVEN NEW POSITION IN BRITISH CABINET

London, England.—Prime Minister Ramsay MacDonald, in the House of Commons, made the first announcement regarding his expected plans for changes in the Labor Cabinet when he stated that J. H. Thomas, Lord Privy Seal, at present in charge of the government's programme for relief of unemployment, is to be made Secretary of State for the Dominions—a newly created cabinet post.

Until a few years ago dominion affairs came under the British colonial office. Then, in deference to the increased independent status of the Dominions, the title of that department was changed to the Dominion and Colonial office, though the administration of the territories remained in the hands of one minister.

MacDonald informed the house that the approach of the imperial conference, which will be held here in September, and the nature of its business necessitated a complete reorganization of the Dominion and Colonial offices and the placing of a separate minister over each. He then said that Thomas will accept the new post of Secretary of State for the Dominions. It is entirely new to Thomas, however, as in MacDonald's first government, in 1924, he was colonial secretary and became extremely popular with the dominion governments and their representatives in London.

## SUBSIDY ON WESTERN COAL IS ANNOUNCED

Ottawa.—The terms by which inter-provincial movement of Western Canadian bituminous coal will be subsidized by the Dominion Government were announced by Hon. Charles Stewart, Minister of the Interior.

By an order-in-council signed by the Governor-General, coal mined in the Crown's West Pass district of British Columbia, and in the bituminous and sub-bituminous areas of Alberta, and shipped to points in the province of Manitoba will be subject to a reduction of freight rates which will enable it to compete with foreign coal. The assistance to the industry will be \$1 a ton, effective for one year beginning January 1. The reduced rate will be applicable to coal used for domestic and industrial purposes.

Another order-in-council will give assistance of 50 cents a ton on briquettes and lignite coal in carbonized form mined in Saskatchewan and is applicable only when briquettes are used for domestic or industrial purposes. It will apply for one year, commencing June 1.

The administration of these assistance movements of coal will be under the direction of the Dominion Fuel Board. Regarding the British Columbia and Alberta coal, it was announced the rate reduction will apply only if the coal has less than 12 per cent. moisture and a calorific value of more than 11,000 British thermal units per pound in the raw state.

"This assistance," declared the Minister of the Interior, "is in line with the government's policy of giving every encouragement to Canadian production of coal. It will result in lower costs to the consumer and will, it is believed, do much to relieve the unemployment situation, whereby miners are working only a few hours a week."

## Calgary Man On Committee

Members Of Pensions Board Have Been Announced By Minister Of Health

Ottawa.—The personnel of the War Veterans' Allowance Act Committee was announced by Hon. J. H. King, Minister of Health and Pensions in the Federal Cabinet.

The chairman is Walter S. Woods of Calgary. Other members of the committee are Lieut.-Col. Douglas Carmichael and Major F. J. Garneau. Mr. Woods was a member of the first Division of the Canadian contingent and for the last ten years has been superintendent of the Soldiers' Settlement Board at Calgary. Col. Carmichael, who comes from Owen Sound, was minister without portfolio in the Drury government. Major Garneau is the son of the late E. B. Garneau of Quebec. He is a member of the staff of the Department of Soldiers' Civil Reestablishment in Ottawa.

## Made Record Flight

Commercial Airways' Plane Travels 1,639 Miles In Eleven Hours

Edmonton.—All records for air travel in the north country were smashed when a Commercial Airways aeroplane covering the first mail and express to Akivik, N.W.T., situated at the mouth of the Mackenzie River, reached the far northern port, making the hop from Fort McMurray, a distance of 1,639 miles, in 11 hours and 5 minutes. It was the first mail since the winter tie-up, and factors, traders and natives gave the red Bellanca plane a boisterous greeting. It brought mail, express and those things that ordinarily would not be available to anyone in Akivik for several months.

As it is a two-hour trip from Edmonton to McMurray, anyone leaving this city now, can reach the rim of the Arctic Ocean in close to 14 hours.

## New Radio Receiver

Atlantic City, N.J.—A radio receiver capable of adjustment to compensate for tonal deafness of the individual listener has been demonstrated to radio engineers assembled here. Julius G. Acers, consulting engineer of the New York inventor of the device, explained its function and performance before a meeting of the Radio Club of America.

## Depends On France

Rome.—Italy is willing to suspend her 1930 navy programme pending the outcome of the proposed Franco-Italian conversations on naval limitation, if France agrees to do the same. Dino Grandi, the foreign minister, announced.

## NOTES AND COMMENTS

The weather has warmed up—so has the election campaign.

To secure returns seed must be sown. It applies to the marketing of coal as well as farming.

The seed the coal industry must sow is that of co-operative persistent effort to win back the market which formerly took a large output from the Crows Nest Pass mines.

Government aid of \$1.00 per ton on bituminous coal shipped to Manitoba points does not relieve the responsibility of the coal industry as a whole from persistent effort to promote the sale of coal from this province.

Aggressive salesmanship in every channel available is absolutely necessary, as well as continued research and experimental work to ascertain the most economical method of using coal, for it has a serious competitor in fuel oil and water power which must be kept alive to the exigencies of the situation by repeated telegrams and letters. A live board of trade in any town should be the vehicle of expression on those matters which affect its interests and general welfare. For this reason every progressive citizen will support its efforts.

Very shortly the Board of Trade will hold its annual meeting. It cannot review the year with any spirit of boasting, for the simple reason that a period of quiet business made it impossible to embark on any major activity in the town's interests. However enthusiastic people may be towards certain improvements, they are crippled to a large extent if actual cash cannot be obtained.

One item of satisfaction is that of having helped in securing the freight subvention rate which will be of benefit. All interests concerned saw to it that government representatives were kept alive to the urgency of the situation by repeated telegrams and letters. A live board of trade in any town should be the vehicle of expression on those matters which affect its interests and general welfare. For this reason every progressive citizen will support its efforts.

It was noticeable at Murphy's meeting on Saturday that there were men there who would not allow his statements on the flag to pass unchallenged. It may be only a bit of bunting, but it stands for the observance of law and order and the upholding of the constitution and fair play, which is more than can be said for the "red flag."

If there is anything more hideous than "yowling" cats in the night, we have yet to hear it, except it might be the shrieks of someone being tortured to death. Dogs must be licensed, yet they are not one-tenth the nuisance of howling cats.

Roaming horses were an abominable nuisance until a year or so ago. The proximity of the fox farm has lessened this nuisance. If there was an avenue whereby roaming cats could be eliminated, those who are annoyed by their howling in the night would rejoice. They are destructive of bird life and of no economic value.

The Canadian Postmasters Association plays up to the mail order houses in such a manner as to suggest eating out of their hand. There is no sense of loyalty to home institutions, or of the people who by helping to develop towns help to furnish revenue to those who are members of the Postmasters Association. No wonder the

Robert Simpson Co. and the T. Eaton Co. are arranging for the entertainment of delegates at the Postmasters Association convention to be held shortly. And the Robert Simpson Co. offer a cash prize of \$75 to the postmasters present who offer the best "Suggestion for helping the Robert Simpson Co." No wonder! They should turn their monthly magazine into a straight advertising sheet for the mail order houses. It is almost that now.

The unemployment problem becomes harder. Conferences between mayors of cities are being held, the government of the Dominion plans a conference later on, and meanwhile thousands of men are seeking work in every country in the world. The only solution is shorter working hours in order to more evenly distribute work. Efficiency has put so many out of work that this appears to be the only remedy.

Apparently the only trades union card Harvey Murphy, Communist organizer, carries, is a Communist membership card. Yet he has more to say to the miners than any one of their own union, and doubtless has his eye peeled for a job as a union official if he can have the old officials fired.

The Safest Investment Is  
Life Insurance

Isn't it worth a whole lot to rest assured that you have created an estate through carrying life insurance. More especially is the feeling of security valued by the man who has a young family dependent on him as the bread-winner.

I can advise you on a policy suited to your particular needs, no matter what your income may be. Make it a point to discuss it with me. I will be pleased to give you complete details and show how it is possible to carry adequate insurance with very little inconvenience.

# Alberta Provincial Election

## Electoral District of Rocky Mountain

Remember Polling Day  
**Thursday, June 19**  
 From 9 a.m. to 6 p.m.

VOTE FOR  
**GEORGE E. CRUICKSHANK**

INDEPENDENT CANDIDATE

The interests of all  
 classes will be capably  
 served by voting for the  
 Independent Ticket

My appeal to the voters of Rocky Mountain constituency as an Independent candidate is based on strictly non-partizan lines. It was on that condition only that I was prevailed on to accept nomination by friends and supporters in various parts of the constituency.

My residence among you for twenty-six years has given me ample opportunity to be thoroughly conversant with the peculiar problems affecting a constituency which is almost entirely a Labor district. The success and development of the coal industry means just as much to me as it does to the humblest mine worker, therefore you may rest assured that Labor's welfare will be my first consideration.

I feel that there must be a broad view taken of conditions that prevail. There are many angles from which the interests of mine workers particularly must be considered, and one of the most important is the close attention which must be given by parliamentary representatives towards developing wider markets, and if necessary securing government aid towards this end.

This calls for persistent and aggressive action, and my personal knowledge of all that has happened in the mining areas is based on many years residence.

I feel confident that measures can be proposed and adopted whereby a measure of old-time prosperity can be restored to the mining areas which furnish the biggest employment and revenue in Rocky Mountain constituency. The remedy for the quiet times we have experienced lies to a considerable extent in the manner in which the problems are grappled with. With my personal interests depending on the success of the mining industry, naturally anything I can do to promote its interests and the welfare of everybody working in the industry will receive first consideration.

I feel confident I can represent you faithfully and ask not only your support but your influence among your friends on Polling Day, Thursday, June 19th, 1930.

Our vital interests are our only politics, and it is on these grounds that I make this appeal for your support, untrammelled by party affiliations but with the single purpose of serving you to the best of my ability.

Yours faithfully,

Hillcrest, Alta., June 7, 1930.

GEORGE E. CRUICKSHANK

**A VOTE FOR CRUICKSHANK is a VOTE  
 FOR EFFICIENT REPRESENTATION**

## Prairie Provinces Are Well Equipped With Facilities For Marketing Purposes

Few large surplus-producing agricultural regions are as well equipped with facilities for the distribution and marketing of agricultural products as the Prairie Provinces of Western Canada. Two transcontinental railways with thousands of miles of branch lines tap every part of the producing territory of this region. On the west these railways deliver prairie products to the ports of Vancouver and Prince Rupert. To the east the products are either carried by all rail routes to the Atlantic seaboard or St. Lawrence River ports or, as in the case of grain, delivered at the head of the Great Lakes. An additional outlet for products from this region is being provided by way of the Hudson's Bay. A railway extending northward from the heart of the producing territory now finds an outlet through Churchill on the Bay where facilities are being provided for handling grain and other products by a new short route to the markets of the British Isles and Europe. Radiating from the numerous towns and cities on these lines of railway, run many thousands of miles of good roads for the delivery of farm products from the adjoining agricultural regions.

Western Canada is a surplus-producing region. The major portion of its products is marketed elsewhere in Canada, or in the markets of the world. There are, however, satisfactory local markets in the towns and cities of the prairies for most of the perishable products produced, such as fruits and vegetables. A large quantity of poultry and dairy products is also produced for home consumption. The surplus of these products, however, finds its way to more distant markets. In the larger towns where railway terminals, facilities are provided for the handling of livestock, grain and other products.

Outstanding progress has been made by the farmers of the Canadian west in the matter of co-operative marketing. Probably no group of farmers anywhere has advanced more in the matter of self-help in marketing. The Wheat Pool of Western Canada is the outstanding example of this development. More than fifty per cent of the grain of Western Canada is handled through this farmer-owned organization. About \$30,000,000 have been invested by producers in their own grain-handling facilities which consist of approximately fifteen hundred country elevators and a dozen or more large grain elevators at the Great Lakes and Pacific Coast ports. Another outstanding farmer-owned grain-marketing association is the United Grain Growers, operating more than five hundred country elevators and engaging in various other phases of business on behalf of producers. A large part of the livestock in Western Canada is marketed through the Provincial Livestock Pools which, together with similar organizations in the eastern provinces, form a national livestock marketing agency. Similarly in the marketing of wool, a Dominion-wide organization with a western branch office at Regina is handling in the neighbourhood of four million pounds annually, which represents more than one third of the Canadian crop. So active in the marketing of grain, poultry and dairy products and in many other lines, extensive facilities have been provided by farmers themselves for the handling of their products. Many of the co-operative marketing organizations have been in existence for a period of ten to twenty years and have thus proven their worth. In competition with these farmer-owned and controlled organizations there is, of course, a well developed system of marketing operated by private capital.

Queen Elizabeth, of England, was presented with a wrist watch on New Year's Day, 1922. It was a ruby and diamond studded affair.

"Your tooth aches? If I were you I would have it out."  
"So would I if I were you!"  
—Gutteriez, Madrid.

W. N. U. 1841

### Trek Is Satisfactory

March 9. Reinder From Alaska Proceeding According To Plans. News of the progress made by 3,200 reindeer on their long march from Alaska to the Mackenzie divide in Canada indicates that the plans of the Dominion authorities for transfer of the herd are proving adequate. A. E. Forsell, of the Interior Department, who accompanied the excursion in its first weeks, has returned to Ottawa with word that all is going satisfactorily.

A detail of the equipment of the expedition is the transport department, which numbers more than 300 stags. They serve as motive power for the fifty sleds on which the camp outfit is carried. Only one steer is hitched to a sled, but an idea of the difficulties of the trip may be obtained from the fact that two stags go ahead of each sled to break the trail.

Mr. Forsell does not report any signs of nostalgia among the emigrants. So long as feed is sufficient and climate congenial they do not care under what flag they dwell.

### Winnipeg Newspaper Union

(By Annette Werthington).

A stunning outfit for the deb and the little sub-deb who follow closely in the styles of her debutante sister. Style No. 3282 is a rayon printed crepe in Independence blue. The shoulder and hipline bows are of plain crepe in the deepest shade of the print.

The long-waisted bodice is caught with plaits at left hip beneath the bow, which makes the right side quite deep emphasizing its diagonal line. The gathered tiers of skirt are decidedly youthful and ripple softly each time wearer moves.

This versatile model comes in sizes 12, 14, 16, 18 and 20 years.

It is dainty for afternoons in chiffon in tomato red shade, or soft fawn silk crepe in Independence blue.

Navy blue wool crepe with vivid red bows of false silk crepe is neat and girlish for classroom.

Wool challis prints, feather-weight self-checked tweed, crepe de chine, crepe satin, and canton crepe appropriate.

Pattern price 25 cents. Be sure to fill in sub-deb who follows closely in the styles of her debutante sister.

Women in Konia, Turkey, are now engaged in peddling milk from door to door.

### Beating Father Time Two-Crop-a-Year System Speeds Up Research Work

The success which has attended the efforts of L. H. Newman, Dominion Cerealist, and his staff at the Central Experimental Farm of the Dominion Department of Agriculture in growing two crops of grain a year, one in the field and the other in the cereal greenhouse, is a fine example of putting one over on Father Time. The most important work of the Cereal Division is the development of new varieties of cereal and other plants particularly adapted to Canadian conditions and demands. In the cereal greenhouse grain harvested from field test plots in the fall is planted again within a month or so, and the work of research and development is carried forward another crop year during the one calendar year. This means in practical result that the research work which usually took from eight to ten years to carry out in connection with a specific hybrid development under the old system of field test plots can now be done in from four to five years under the new two-crop-a-year system. The development is one of major significance to Canada's future as a producer of cereal and forage crops.

### Poultry Grading a Success

Record Of Performance Has Resulted In Better Birds

Ten years in operation of the Canadian Record of Performance for Poultry under the supervision of the Dominion Live Stock Branch has resulted in 61,945 headed birds having qualified for R.O.P. certificates, having laid at least 150 eggs during the record year, while an additional 17,907 hens laying 225 eggs or more each during the record year have qualified for R.O.P. Advanced certificates. Record of Performance is a poultry grading medium open to commercial and farm flocks throughout Canada through which the real production qualities of hens is determined and established in tangible form.

### Menace To Farm Animals

Horsetail Weed Usually Found In Poorly Drained Fields

Horsetail, a weed familiar throughout Canada, is a menace to horses and other farm animals because of its poisonous properties. The Botanist of the Dominion Department of Agriculture, calling attention to the harmful effect of this weed on horses, cattle, sheep and sometimes pigs, points out that the presence of the weed in fields is usually an indication of the need for drainage. In cases where the weed in full steps should be taken for its complete eradication through proper drainage and adequate soil cleaning by a thorough system of crop rotation.

### Commercial Orchards In B.C.

In British Columbia commercial fruit-growing is of comparatively recent origin, but the development of commercial orcharding has been very rapid, especially during the last ten years. The first apple trees were planted about 1850, but not until after the completion of the Canadian Pacific Railway in 1885 were there many trees planted for commercial purposes.

"Theobromos," the scientific name of cocoa, means "food of the gods."

### C.N.R. WESTERN REGION OFFICIALS PROMOTED

A. C. EGAN

Announcement has been made of the promotion of A. C. Egan, Winnipeg, controller, Canadian National Railway, western region, to assistant controller of disbursements for the system, with headquarters at Montreal. T. J. Gracey, Winnipeg, assistant controller, is promoted to regional auditor. The appointments are effective, June 1.

Mr. Egan, who was born in Winnipeg, 1883, entered railway service in 1901. With the exception from 1919 to 1923, when he served the railway in Toronto, as assistant to controller and general auditor, Mr. Egan had made Winnipeg his headquarters, serving in such capacities as accountant, chief travelling auditor, auditor of agencies, and regional controller; the latter he now relinquishes to take on more responsible duties at general headquarters in Montreal.

Mr. Gracey, who was born in Kingston, 1889, came to Winnipeg, May, 1923. He entered railway service, in 1906, at North Bay with the T. & N. O. Railway, serving that company in various positions until 1920, when he became assistant auditor of disbursements, at Toronto, for the Canadian Northern Railway. In 1923, Mr. Gracey was transferred to Winnipeg to his present position, and now becomes regional auditor.

### NEW PRESIDENT

Dr. Chas. Cammell, Deputy Minister of Mines, at Ottawa, who has been elected president of the Royal Society of Canada for 1930-31.

### How Cologne Was Named

Is But Slightly Changed Form Of Latin Word Colonia

A recent postal questionnaire addressed to 25 persons at random revealed a hazy idea about the City of Cologne. The question was: "How did the German city of Cologne on the Rhine derive over some fragrant rocks of something about the city and that eau de Cologne was bottled Rhine river water. They were all wrong. Cologne (Köln, in German), is nothing but a slightly changed form of the Latin word colonia. Its full name was Colonia Agrippinae. This early city of the Ubii, a people mentioned by Julius Caesar, was changed to a colony, and named after Agrippina, who was in camp with her husband for several years. This Agrippina was the granddaughter of the famous Agrippa, the admiral of Augustus. One of her brothers was the Emperor Caligula, and her son was the Emperor Nero. The city is rich in Roman antiquities.

### Choice Of Two Methods

Molasses Can Be Given To Hens In Water Or Food

There are two methods of giving molasses to chickens. You can mix it at the rate of a pint of molasses to four quarts of water and give them the milk to drink in usual quantities. Be sure to give a fresh supply daily after cleaning drinking vessels carefully, as molasses will ferment if left in vessels for a few days, especially in warm rooms or temperatures. If preferred, you can use this molasses water for mixing your wet mash and they will get it in feed.

### World's Youngest Traveller

Only six weeks old, yet little baby Richards has spent four of those weeks in travelling 7,500 miles from India to the home of grandparents, in London, England. The child's father and mother died within a few days of each other in the interior of India, and the baby was sent back to England.

### A Quick Thinker

Henderson's evening suit was rather old-fashioned. His figure was not one which showed clothes to advantage, either.

One evening, as he stood in the vestibule of a restaurant waiting for his wife, a tall, pompous man came up to him.

"I say, my man, are you the head waiter?" he drawled.

What Henderson lacked in hearing he made up in quick thinking. With-out hesitation he turned to the other.

"No," he said, "I heard him tell a young man today that he didn't want to see any more applicants for jobs."

### A Freak Fig Tree

Parasites may flourish right under the nose of the government, according to a story from a vineyard in California. A fig tree, about three feet high, was found growing out of the side of a palm tree in the courtyard grounds. Its roots drew sustenance from the mold in the slices of the palm and from the sap of the tree. The parasite recently blossomed with the other fig trees.

No product in the world has as great a turnover as chewing-gum.

Black, brown and cinnamon bears all belong to the same species.

Natural deposits of sand and gravel occur in all the provinces of Canada.

## Canadians No Longer Have Idea That East and West Are Separate Communities

### Working To Music

Senegal Negroes Have Novel Method Of Ensuring Manned Action

A common exercise among teachers who wish their pupils to "think" music is to allow them to sing part of a tune and then break off, picking up the tune at a certain point an instant later. Among the negroes of Senegal, however, this exercise has a practical use that is not all musical. When a vessel has got on to a sandbank the way of getting it off again is by a large number of divers plunging into the water together and lifting it on their shoulders. Sometimes as many as five hundred are engaged on such a task. They swim round the vessel all singing together and at say, the eighth bar, they dive, mentally continuing the melody while under the water, then at the 12th bar they all push, or lift as the case may be, and at the 16th all rise to the surface again. By this means they have no need to hear the leader counting or beating, and none of their efforts are lost by any individual being before or after the others. To do this, however, they must have a strong sense of time and tune.

### Dodging Auto Test

British Scientists Think They Have Worked Out Plan

If you can do all of the things listed below you probably have a 50-50 chance of crossing Piccadilly Circus in London, England, or St. James Street, Montreal, without getting hit by an automobile.

Scientists of the British Industrial Health Research Board believe the tests which they have designed according to measure the factor of accident proneness. They ask you to:

Dot a series of small circles passing at an increasing speed. Follow the irregular movements of a mechanically controlled pointer.

Keep a green disc controlled by two handles above a white moving disc.

Keep the stylus with a ball on the end inside a small metal cup without touching the sides, the cup being moved in an irregular way.

Form a rectangle out of four pieces of differently shaped metal.

Fit strips of metal of varying length into a frame.

### French People Saving

Accounts In Banks Show Steady Increase Every Year

Despite all the crises France has passed through in recent years the people have not lost their traditional habits of economy. Statistics of savings banks accounts, for 1929, which have just been published show that 9,214,000 people have accounts in savings banks and that the total deposits, which every year show steady upward progress, late year totalled over \$800,000,000. Other statistics which have been published show that France has now the largest gold holdings per capita of any country in the world, beating even the United States. During the last year the amount of savings in these popular banks increased 12 per cent.

### A Quick Thinker

Henderson's evening suit was rather old-fashioned. His figure was not one which showed clothes to advantage, either.

One evening, as he stood in the vestibule of a restaurant waiting for his wife, a tall, pompous man came up to him.

"I say, my man, are you the head waiter?" he drawled.

What Henderson lacked in hearing he made up in quick thinking. With-out hesitation he turned to the other.

"No," he said, "I heard him tell a young man today that he didn't want to see any more applicants for jobs."

### A Freak Fig Tree

Parasites may flourish right under the nose of the government, according to a story from a vineyard in California. A fig tree, about three feet high, was found growing out of the side of a palm tree in the courtyard grounds. Its roots drew sustenance from the mold in the slices of the palm and from the sap of the tree. The parasite recently blossomed with the other fig trees.

No product in the world has as great a turnover as chewing-gum.

Black, brown and cinnamon bears all belong to the same species.

Natural deposits of sand and gravel occur in all the provinces of Canada.

### Of recent years a marked change

has passed over the general conception of the relationship between the Eastern and Western moieties of the Dominion. Not so long ago the accepted idea was that the day belt of Ontario marked a gulf between that province and the prairie and Pacific provinces as deep as that which separated the third-patched Dives from Lazarus, safe and happy in Abraham's bosom. To the West lay the granary of Canada while eastward lay the predatory industrialized districts which regarded the granary as their own particular happy hunting ground. That idea has vanished, never to return.

This century has brought no more remarkable change than the realization that Canada is not divided up and parcelled out into any such two antagonistic and antipathetic communities. The clay belt of Ontario is now regarded as a link not a barrier. The farms of the huge region north of Lake Superior will some day merge imperceptibly into the farm lands of Manitoba, Saskatchewan and Alberta, and in the further North hinterland, right from the Maritime provinces westward will be found the same Laurentian plateau that holds the immense mineral wealth of the Dominion. In the future, possibly earlier than expected, mining towns will spring up and with them the rapid development of the industries that are invariably and inseparably associated with urban settlement. Then will arrive the Day of Canada, a day when the Dominion will step forth a complete and fully rounded out nationality.

That may be anticipating, but mining and lumbering are not the only industries where Manitoba is beginning to trespass on what were so long regarded as preserves of Ontario and the East. And the third unexpected and hitherto unsuspected field of enterprise is probably the last that would have occurred to the residents of Older Canada. Who among them would have supposed that the Manitoba industry recording the greatest gain in recent years would be one never before associated with our immediate Western neighbor. Nothing else, indeed, than fishing.

In a recent editorial the St. Catharines Standard stated that during the past few years the inland fishery production of Manitoba had increased over one hundred per cent, and that in 1929, the market value of the 33,000,000 pounds of fish caught for commercial purposes in Lakes Winnipeg, Manitoba and Winnipegosis, and other lakes in the province, aggregated \$2,634,000. The same article noted that a steady expansion had also taken place in the fish production of the other prairie provinces, though they did not equal the gains disclosed in the new Manitoba total.

Indications are, this article also declared, that the advance will continue in each of the three provinces for additional fishing waters are being opened each year. Settlement advances and transportation facilities are extended. It seems reasonable to assume, also, that a settlement on Manitoba's Hudson Bay coast develops, sea fishing will be an increasingly important factor. Every indication of the multiplication of activities and lines of production in the west is welcomed by those in the older provinces who realize that their prosperity depends upon the economic soundness, stability and self-reliance of each of the various component parts of the whole country.

### Prefers a Canadian

A lass in Lancashire, England, with a "weakness" for mounties, has asked Mayor Frank Plant for the name of a suitable man with whom she can correspond. A letter from the girl, received by the Mayor, sets forth that the man must be of good birth, character, physique, good looking and with good prospects. A postscript says the young lady "would like a Canadian mountie, if possible, to correspond with."

"Did you go elephant hunting in Africa?"

"Not much. It is so uncomfortable as the bag is full so quickly."

Musket, Vienna.

room, and Grandma likes to talk with him."

"A fine chance she has when you and he are watching the moon rise from Wade's Hill," Jim countered with good-natured sarcasm.

"Whoever on this earth told you I climbed Wade's Hill with him?"

Charman was so astonished that Jim smiled as he replied: "It may have been the whip-poor-will that was singing its head off somewhere in the vicinity that evening; and then again, it may have been Lizzie Baker. There's precious little you, my friend, that Lizzie doesn't broadcast to—well, my mother, for instance. She hasn't forgiven me, I understand, for taking a detour from the straight and narrow path that leads to your front door; and in consequence . . ."

As he hesitated, Charman gave way to a peal of laughter in which he joined.

"I wonder why it is that our elders take our slight so much more deeply to heart than we do ourselves," said the girl at last. "Miss Lizzie thinks she owns a piece of me, you know. In her opinion every man in Wickfield should be in love with me."

"She's not far off there," responded Jim gallantly. "But as for slight—why, I—I never . . ."

He was suddenly inarticulate, and Charman stretched out an impulsive hand, laying it on one of those that gripped the steering wheel, which unexpected contact caused the car to swerve.

"You don't owe me any explanation, Jimmy."

"I think I do," he answered as she removed her hand, "but not on the subject of Clara Darling."

"About what, then?" asked Charman in surprise.

"They had reached Eastboro, and Jim answered, as he slowed up before the bank: 'I'll tell you some day,' but before she could ask more he had vanished under a side door that gave access to the building after banking hours."

On the way home, however, he skillfully managed to keep the conversation away from his own problems, and here. He told of happenings at the bank that made her laugh—be asked questions about trivial nothings that kept her mind from her encounter with Deacon Purdie; but when he dropped her before the old Davis house at half-past five, Charman was a different girl from the discouraged teacher he had picked up an hour or so before.

"You're a good doctor, Jim," she said gratefully as she left him a week," commented Grandma, to whom Jim waved as he rode away.

"Not but what it's been sort of an exciting day, though. A man came through on his way to the White Mountains riding one of those infernal machines—a motorcycle, I mean. I heard him coming from clear down the street so I was watching and saw everything plain as day. It's a wonder he hadn't killed a dozen children, going such a rate; and just as he got here Lizzie Baker's cat ran across the road chasing the Garfield's Plymouth Rock rooster that had got loose somehow. It was a bad combination, I'll admit that. You know how hens behave when they cross a street, and I can't see that roosters act much different if they do belong to the male sex. Anyhow, that man on the motorcycle turned

out so as not to hit the cat, and—well, I suppose he must have hit something for he went back over heels and that contraption he was riding lay a-top of him with the engine running."

"Was he killed?" gasped Charman.

(To Be Continued.)

#### Planning Bigger Airships

Could Be Constructed To Carry Paying Loads Says British Designer

Critics of the new airships were answered by Lieut.-Col. V. C. Richmond, designer, and Major G. H. Scott, the navigator of R-101. They were the guests of the City Library Club at a luncheon in the Carpenters' Hall, London, England.

Colonel Richmond said that he could see no reason technically why airships much larger than those so far built should not be constructed to stand the stress of weather and to carry useful and paying loads.

The British Empire was, he thought, peculiarly suited to airship transport because of the long distances that had to be traversed over land and sea.

Economics, just as much a question of research as the building of the ships, was to be the next part of their program. "Do not ask me where will be the fare to India. You might as well have asked George Stephenson what would be the fare from Stockton to Darlington."

"Once speed has been achieved in conjunction with reasonable comfort, airship travel will become a necessity, and it is impossible to forecast what people will pay for a necessity. It is equally impossible to pass an estimate on the quantity and flow of passengers. The factor of speed will create a demand."

None of the calamities predicted for the two new airships had, he said, come true. Both R-101 and R-100 had flown their trials in some of the worst weather ever recorded for October and November. "Finally, the Germans have now decided to copy us instead of our copying them."

A new section, Colonel Richmond also said, was being put into R-101 to overcome the unexpectedly great weight of the engines and other components, and after research would be conducted into the problem of long journeys across the sea.

Major Scott said it was quite wrong to say that hundreds of men were required to handle these ships. R-100 and R-101 had never had more than fourteen men to bring them to the mooring mast. In spite of all criticism, airship development had been a success, and what was now wanted was continuity of development. "We have to show that these ships are reliable and can run to schedule."

#### Silk From Carbon Dioxide

From carbon dioxide in the air eventually will be obtained wool pup, artificial silk, paper, explosives, and other material, said Dr. Herbert Levinstein, president of the Society of Chemical Industry, in an address to the British Institution of Chemical Engineers. Everywhere in the atmosphere and water vapour, he said, the same fundamental chemical constituent is found.

Douglas' Egyptian Liniment is especially recommended for spider, or infection of cow's teat. Invaluable also in cases of sprains, curbs and sprains.

#### Would Solve Some Problems

The perfect bridge hand is said to contain thirteen cards of one suit. Now if someone will work out a perfect mill hand, a perfect deck hand on a perfect harvest hand, some problems may be solved.

Customer—"I'd like a nice birthday present for my son. He likes something to blow."

Helpful Merchant—"How about a good handkerchief?"

Mindard's for Insect Bites.

#### Inland Fisheries Show

##### Gain in Production

Marketed Value Last Year In Manitoba Over Two Million Dollars

While agriculture, the basic industry of Manitoba, together with manufacturing, mining and other industries has advanced substantially in the province in recent years, the production from the inland fisheries has probably shown the greatest gain. In the past five years the fisheries production has increased more than 1700 per cent. In 1924 the marketed value of the fish caught in Lake Winnipeg, Manitoba, Winnipegosis and other lakes was \$1,232,000, while last year, it was \$2,634,000. In 1929 the commercial fishermen of the province caught 33,000,000 pounds of fish, a record for Manitoba, with a marketed value of \$2,634,000.

#### IS BABY TEETHING?

Teething time is a time of worry to most mothers. The baby is nervous; fretful; feverish. His little gums are swollen and sore; diarrhoea, constipation, colic and sometimes convulsions set in—neither baby nor mother can sleep. These troubles can be quickly banished, however, through the use of Baby's Own Tablets concerning which Mrs. Louis Grubb, Teeswater, Ont., says:—"I have used the Tablets for all my babies while teething and have found them a splendid medicine."

Baby's Own Tablets are sold by all medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

#### Bananas Grown In England

An exhibit which attracted considerable comment at the Royal Horticultural Society's Fruit Show, in London, England, was a bunch of bananas weighing nearly half a cwt., which had been grown in England. This is the first time for 25 years that bananas grown in this country have been exhibited at one of the society's shows.

#### New Storage Elevator

It is reported from Ottawa that a 2,000,000 bushels interior storage elevator is to be built at Leithbridge by the Federal Government this year, supplementing private wheat storage facilities now existing in similar elevators at Saskatoon, Moose Jaw, Calgary and Edmonton.

A safe and sure medicine for a child troubled with worms is Mother Graves' Worm Exterminator.

#### Noly Nutances

A Massachusetts court has ruled that airplanes flying less than 100 feet from the ground commit a trespass on private air right. But what we are more interested in discovering is how far our horizontal air rights extend, as against the neighborhood?

Major Scott said it was quite wrong to say that hundreds of men were required to handle these ships. R-100 and R-101 had never had more than fourteen men to bring them to the mooring mast. In spite of all criticism, airship development had been a success, and what was now wanted was continuity of development. "We have to show that these ships are reliable and can run to schedule."

A new section, Colonel Richmond also said, was being put into R-101 to overcome the unexpectedly great weight of the engines and other components, and after research would be conducted into the problem of long journeys across the sea.

#### Little Helps For This Week

"Changed into the same image from glory to glory."—2 Corinthians 11: 18.

O hearts of love! O souls that turn like sunflowers to the pure and best!

To you the trust is manifest. For they the mind of Christ discern Who lean, like John, upon His breast.

—John Greenleaf Whittier.

Stand in Christ's presence and mirror His character, and you will be changed in spite of yourself, and unknown to yourself, into the same image, from character to character. Every man is a reflector; that is the principle upon which this is based. He cannot help reflecting; he cannot help showing the environment in which he has lived, the influences that have played around him. All friendship, all love, human and Divine,—is spiritual, so that it is so difficult in reflecting the character of Christ that we have never been in visual contact with Him. He does not appeal to the eye; He appeals to the soul, and is reflected, not from the body, but the soul.

—Henry Drummond.

Miller's Worm Powders are complete in themselves. They do not only drive worms from the system, but repair the damage that worms cause and so invigorate the constitution that it speedily recovers from the disorders of the digestion that are the result of the work of these parasitic intruders. They do their work thoroughly and strength and soundness follow their use.

#### Survey Of Wood Waste

The Vancouver Forest Products Laboratory conducted by the Forest Service, of the Department of the Interior, is engaged on a survey of wood waste in British Columbia sawmills with a view to assisting the industry in devising methods of profitable utilization of wood now wasted.

#### Misard's Drives Away the Headache.

An automobile which can be taken to pieces and placed in a small garage, has been invented in Germany.

#### CHAPTER XV.—Continued.

"Oh, no, she doesn't!" contradicted Grandma, "not if she finds the right man, anyway. School teaching's all very well for a while; but I guess the girls are just the same inside as they were in my day, except maybe they're more sensible. A girl wants her own man and her own home and her own babies, whether she wears her skirts to her knees or trailing in the dust as they did when I was your age. I saw a letter in the Boston paper protesting about 'this leg show' as the woman called it. I made me sort of mad. I guess she was over-seventy, or else terribly behind the times. I'm too old to make changes myself; but it would be a dull world if nobody made 'em; and for my part I can't see what's wrong with a pair of legs. Even Mrs. Merry's had her best dress shortened, though, being the minister's wife I expect some folks'll criticize her. If you're not too tired, child, I think you'd better make something good for supper. The doctor's been scurrying 'round all day, and is liable to have an appetite. Here he comes now!"

#### CHAPTER XVI.

On a bright afternoon in late October, Charman, who had stayed after school to correct some papers, was just starting on her homeward walk when a familiar car approached and drew up beside her.

"Ride?" questioned Jim shortly.

"You don't seem to be going my way," she answered.

"What of it? I'll have you back in time to get your supper, and a breath of air will do you good. Hop in."

Charman obeyed.

"I hope Grandma won't think I'm lost or kidnapped," she said uneasily; but in a moment Jim saw that she had relaxed, and guessed that his timely invitation was a relief.

"Tired?" he asked, as they moved away from the old brick schoolhouse and headed toward Eastboro.

"A little," the girl admitted. "It's been a trying day. I suppose such days come to all schoolma'ams, and I'm no exception."

"What was your special brand of trouble this time?"

Charman looked up with a quick smile.

"Deacon Purdie."

"That old mud turtle! What business did he have with you?"

"Have you forgotten that he is now the dotting father of six?" smiled Charman. "To make a long story short, Jim, Luella's oldest, who's a smart Aleck if there ever was one, was too impatient yesterday to be endured. I sent him home

with a note saying he could not return without apologizing; and his loving stepfather took it to heart."

"What'd he say?"

Jim was running slowly in order to watch Charman as she talked. She met his eyes with a wistful smile.

"Oh, let's forget it! He's—"

"You'll forget it quicker if you get it off your chest," advised Jim wisely. "Go on."

"He said that his son (note the 'son,' Jimmy!), was not going to apologize to 'no Davis.' He implied that he held the school board in the hollow of his hand, and would make things hot for me unless I let the boy come back without saying he was sorry. And I can't, Jim. I wouldn't have a shred of discipline left if I allowed it. All the children heard my ultimatum, and—Oh, I believe, honestly, that the deacon is just trying to get even about those dreadful beads! Don't tell Grandma, Jimmy. It would worry her to death; but if I lose the school . . ."

Her voice trembled, and because Jim waited more than he'd ever wanted anytime, to tell her that the school might "go to the devil" if only she'd see a certain subject the way he did, he opened the throttle and said nothing at all until he had himself. "Don't let me speak until they reached a bit of woodland where he stopped the car."

"Look here, Charman." His voice was the least bit husky, and his arms were folded across his chest in an effort to keep from temptation. "Don't let that worry you a minute. The deacon's on the school board, of course (more shame to Wickfield), but he's only one. Do you imagine that his word would weigh in the balance against yours with the other members, George K. and Doctor Howe? Don't let him scare you. Just stick to your guns and everything will be all right. Gosh! I wish you'd order me to break his ugly nose!"

Charman laughed. Already her troubles seemed miraculously lighter.

"You think I'm right then?" she questioned humbly.

"Of course, you are! Cheer up, now, and relax. Shut your eyes, if you want to, and I won't bother you with talking. You need a rest."

The car moved forward, but though the girl closed her eyes obediently for a few moments, they wouldn't stay closed.

"There's no use my mising this lovely foliage," she explained. "It seems even more gorgeous than usual to me; and Grandma's sure Miss Lizzie's cut-leaf maple was never quite so gay."

"I think it's only that every year the coloring surprises us a little," replied Jim thoughtfully. "We're used to seeing it all green. Then comes a frosty night and—presto change! We wake up and the scene's different, the way they do it in a theatre."

"I believe you're getting poetic in your old age!" laughed Charman light-heartedly.

"I must have caught it from you, then," he responded.

She answered, a bit reproachfully: "If you did, the infection can't be very recent. You're a good deal of a stranger these days, Jim Bennett."

"He threw her a quick glance."

"I understood that your evenings were engaged?"

"How?"

"Entertaining your gentleman boarder," he answered honestly, and was furious to feel the color creep into his face.

"What would you have me do—lock him in the wood shed or his office?" she retorted. "After all, Jim, a boarder is supposed to have the privilege of the family sitting

#### Before Her Baby Came

"I have used several bottles of Lydia E. Pinkham's Vegetable Compound and find it helps me wonderfully, especially before childbirth. I have five lovely children. After my last baby came I had a miserable pain in my right side so I bought another bottle of the Compound and I feel fine now. I work outside during the fruit season in addition to my housework."—Mrs. Charles Slingerland, R.R. #4, St. Catharines, Ontario.

## Personal and Local

Dr. McConkey of Edmonton has been acting during the absence of Dr. Borden in Edmonton.

A ladies' department for haircutting and marcelling has been added to Graham's barber shop.

Mrs. E. R. Kennedy and baby Ellen Jean have returned to Cranbrook after spending a nice vacation with her parents, Mr. and Mrs. E. W. Beart.

The King's birthday was honored in Cameron school by a short program arranged by Miss Yuill, principal, assisted by the teachers, Miss Margaret Reid and the Misses Margaret and Ethel Dunlop. The Rev. A. D. and Mrs. Currie were visitors.

O.E.S. Whiteside, general manager International Coal and Coke Co., at Coleman, Alta., accompanied by Mrs. Whiteside, motored into Nelson on Sunday, via Spokane.

Walter Bobbitt is laid up with injuries received in a car smash at McGinnis' hill on Monday. A car collided with a car driven by a party named Morris, in which Mr. Bobbitt was riding. A little child was injured in the other car, and was taken to Natal hospital.

Lieut. Zoutendyk of the Salvation Army was assisted for two days this week by Capt. Belkovich, from Macleod. The captain, who speaks several Southern European languages, was a great aid in Salt-Denial collecting among the foreign born residents. Also open-air meeting held on Tuesday night, his singing, cornet playing and speaking aroused favorable comment.

### Words! Words! and More Words!

The more Murphy talks the more votes he loses—so let him ramble on. Give him enough rope, he'll do the rest. Just another week to see how far his influence reaches. Up to the present he has not revealed the trade union, if any, he ever was a member of. Carrying a Communist card does not prove anything.

### ST. ALBAN'S CHURCH

Sunday, June 15, Sunday School at 10 a.m.; Matins 11:15 a.m.

The J.W.A. members thank all who helped to make the pantry sale a success, also Mrs. Fisher and Mrs. Clifford for their donations. The winner of the cushion was Mrs. Willett, 6th Street, and of the pillow slips, Mrs. G. Forte, Blairmore.

## Reply to Communist Organizer

Blairmore, June 11.

To Harvey Murphy:

My attention has been drawn to the Lethbridge Herald of June 9 in which you state that "P. M. Christophers feathered his own nest by securing positions for his son and daughter," etc.

That statement is quite inaccurate, as I secured the position quite unknown to my father and when I did inform him, he was not at all pleased and wished me to give it up. With regard to my brother he found the position he now holds by ability just as others do.

It surely shows very poor intelligence on your part in coming down to discuss such trivial matters at a meeting instead of putting forth your policy as to how conditions can be bettered, but as far as you are concerned that would be impossible, as all you seem fit to do is to slam at those who are not in agreement with your ideas.

It shows lots for Mr. Stobbs common sense that he has left your party and gone over to labor. It will say something for yours perhaps when you can be a little more accurate in your statements.

---Edith Christophers.

## Provincial General Election

Thursday, June 19th, 1930

## Notice to Voters:

The voter **MUST NOT** use the X mark.

The voter **MUST NOT** place more than one choice in the white space containing the name of any candidate.

The voter **MUST NOT** make the same choice for more than one candidate.

The voter **MUST NOT** make any mark on the ballot not authorized by these directions.

The voter shall go into the booth and with the pencil provided place the figure 1 within the white space containing the name of the candidate who is his first choice.

He may place the figure 2 within the white space containing the name of the candidate he would prefer if the candidate who is his first choice does not need his vote or cannot be elected with it.

He may then place the figure 3 within the white space containing the name of the candidate he would prefer if neither his first nor his second choice needs his vote or if neither can be elected with it. And so on, making as many choices as there are candidates.

The voter may plump for one candidate alone, using the figure 1 without spoiling his ballot, but is urged to vote the full extent of his choices, as it is only by marking the full number of choices that the voter obtains the full benefit of the ballot.

JOHN D. HUNT, Clerk of Executive Council
